

citizens of science

What is COS?

Citizens of Science (CoS) is a free, student-powered mentoring program that connects everyday people with a curiosity about science (our mentees), to passionate medical research students (our mentors).

- ✓ Are you wondering what's behind medicine and diseases?
- ✓ Curious about the latest in biomedical research?
- ✓ No science background & don't know where to start?

WHAT'S IN IT FOR YOU?

Learn the basics

Learn about **DNA, proteins, and diseases** through our online modules **tailored to non-scientists**

Try real lab work

Join a **hands-on** lab session using **real research equipment** – experience a researcher's daily life in the lab!

Meet a PhD mentor

Pair with a **PhD student** to explore **what** they study, **how** they do it and **why** it matters – learn the science happening now!

Community events

Join catered events with **presentations, prizes, and network** with like-minded people from all walks of life
